JOURNAL OF THE ROYAL STATISTICAL SOCIETY (SERIES C)

Editorial Board

J. B. COPAS
Joint Editor

P. R. FISK
Joint Editor

STELLA V. CUNLIFFE
Chairman

B. E. COOPER

I. R. DUNSMORE

A. S. C. EHRENBERG

R. D. ELSTON

A. A. GREENFIELD

I. D. HILL

R. L. HOLDER

W. S. PAIGE

P. GRIFFITHS
Algorithm Editor

D. N. SPARKS
Review Editor

G. WATTS

Applied Statistics

Volume 28, 1979

ROYAL STATISTICAL SOCIETY
25 Enford Street, London W1H 2BH

CONTENTS

Volume 28, 1979

No. 1

		Page
The analysis of transient spectral components with the autoregressive spectral estimator	*W. F. Bennett*	1
A method for mapping the dense and sparse regions of a forest stand	*T. F. Cox*	14
Maximum likelihood estimation of observer error rates using the *EM* algorithm	*A. P. Dawid and A. M. Skene*	20
The computer generation of Poisson random variables	*A. C. Atkinson*	29
Critical values for a sequential test for many outliers	*P. Prescott*	36
Least squares estimation for the inverse power law for accelerated life tests	*H. D. Kahn*	40
A method for the statistical analysis of a changeable independent variable in a batch process	*G. F. Koons, J. J. Geissler and B. Perlic*	47
An application of discrete kernel methods to forensic odontology	*C. G. G. Aitken and D. G. MacDonald*	55
Long-tailed distributions for position errors in navigation	*D. A. Hsu*	62
Corrections		72

Miscellanea

A note on multiple time scales in life testing	*V. T. Farewell and D. R. Cox*	73
Monte Carlo tests: how many simulations?	*F. H. C. Marriott*	75

Letter to the Editors 78

Book Reviews

Exploratory Data Analysis. By *John W. Tukey*	79
Scientific Analysis on the Pocket Calculator. By *Jon M. Smith*	83
Stochastic Modelling of Daily Rainfall Sequences. By *T. A. Buishand*	84
A Guide to Operational Research. By *W. E. Duckworth, A. E. Gear and A. G. Lockett*	85
Introduction to the Design and Analysis of Algorithms. By *S. E. Goodman and S. T. Hedetniemi*	85
Statistics and Experimental Design in Engineering and the Physical Sciences. By *N. L. Johnson and F. C. Leone*	86
Nonparametric Statistics: A Contemporary Approach. By *R. P. Runyon*	87
COMPSTAT 1976. Edited by *Johannes Gordesch and P. Naeve*	87
Statistical Methods for Business and Economics. By *R. C. Pfaffenberger and J. H. Patterson*	88
GEM. A general Econometric Matrix Program. By *L. J. Slater*	89

*Statistical Algorithms AS*134–*AS*137 90

AS134 The generation of beta random variables with one parameter greater than and one parameter less than 1 *A. C. Atkinson and J. Whittaker*; AS135 Min–max estimates for a linear multiple regression problem *R. D. Armstrong and D. S. Kung*; AS136 A *K*-means clustering algorithm *J. A. Hartigan and M. A. Wong*; AS137 Simulating spatial patterns *B. D. Ripley*; ASR29 A remark on AS110 *M. A. Porter and D. J. Winstanley*; ASR30 A remark on AS76 *G. E. Thomas*. Correction to AS76.

No. 2

		Page
Editorial: Invitation to potential authors of "case-study" papers		
Detecting relationships between categorical variables observed over time: a problem of deflating a chi-squared statistic	*P. E. M. Altham*	115
A non-parametric approach to the change-point problem	*A. N. Pettitt*	126
An application of Cox's proportional hazard model to multiple infection data	*V. T. Farewell*	136
The comparison of treatment with control group means in toxicological studies	*Eryl A. C. Shirley*	144
Efficient simulation of the von Mises distribution	*D. J. Best and N. I. Fisher*	152
Approximate percentage points for the distribution of a product of independent positive random variables	*N. Bache*	158
A comment on replicated paired comparisons	*T. P. Hutchinson*	163
Generating uniform polygonal random pairs	*F. Hsuan*	170

Miscellanea

Statistical tests with hand-calculator standard deviations	*G. H. Jowett*	173
Approximations to the inverse cumulative normal function for use on hand calculators	*B. Schmeiser*	175

CONTENTS

No. 2 (cont'd)

Book Reviews

Statistics for Technology. By *C. Chatfield* 177
Data Analysis and Regression. By *F. Mosteller and J. W. Tukey* 177
Mathematical, Statistical and Financial Tables for the Social Sciences. By *Z. W. Kmietowicz and Y. Yannoulis* 178
Introductory Biostatistics for the Health Sciences. By *R. C. Duncan, R. G. Knapp and M. Clinton Miller* 178
The Information in Contingency Tables. By *D. V. Gokhale and S. Kullback* 179
Interactive Data Analysis: A Practical Primer. By *D. R. McNeil* 180
An Introduction to Linear Control Systems. By *T. E. Fortmann and K. L. Hitz* 181
Elementary Statistics: An Applied Approach. By *N. R. Ullman* 181
Applied Statistics for Science and Industry. By *A. Romano* 182
183

Letter to the Editors 184

*Statistical Algorithms AS*138–*AS*141

AS138 Maximum likelihood estimation from confined and censored normal data *M. S. Wolynetz*; AS139 Maximum likelihood estimation in a linear model from confined and censored normal data *M. S. Wolynetz*; AS140 Clustering the nodes of a directed graph *G. W. Oehlert*; AS141 Inversion of a symmetric matrix in regression models *P. Kent* 185

No. 3

Conference Report: Ethical Aspects of Survey Research — *S. Cunliffe and H. Goldstein* 219
A closer look at two alternative methods of statistical discrimination — *M. A. Moran and B. J. Murphy* 223
A simultaneous test procedure for contingency table models — *M. Aitkin* 233
Tests for a single outlier in a gamma sample with unknown shape and scale parameters — *A. C. Kimber* 243
Correlated residuals in non-linear regression applied to growth data — *C. A. Glasbey* 251
Recent developments in the computer generation of Poisson random variables — *A. C. Atkinson* 260
Models for local and systemic effects in bilateral systems — *R. J. Prescott* 264
Tables of the distribution of Spearman's footrule — *H. K. Ury and D. C. Kleinecke* 271
A study of coder variability — *G. Kalton and R. Stowell* 276
Some simple gamma variate generators — *R. C. H. Cheng and G. M. Feast* 290
Trapezium rules, O.K. — *D. Walley and T. Fearn* 296

Miscellanea

The simulation of order statistics from life distributions — *M. J. Newby* 298
A novel clustering method for estimating numbers of bird territories: an Addendum — *P. M. North* 300

Letter to the Editors — *I. Clarke* 302

Book Reviews

Applied Statistics. By *J. Neter, W. Wasserman and G. A. Whitmore* 303
Compatible Fortran. By *A. Colin Day* 304
Algorithmic Methods in Probability. Edited by *Marcel F. Neuts* 304
An introduction to Bilinear Time Series Models. By *C. W. J. Granger and A. P. Andersen* 305
Long Range Forecasting. By *J. Scott Armstrong* 306
The Analysis of Cross-tabulated Data. By *G. J. G. Upton* 306
Biostatistics. By *Wayne W. Daniel* 307
Statistical Density Estimation: A Survey. By *W. Wertz* 308
Sales Forecasting. By *David L. Hurwood, Elliott S. Grossman and Earl L. Bailey* 308
Statistical Checklists. By *J. N. R. Jeffers* 309
Applied Nonparametric Statistics. By *Wayne W. Daniel* 309

The Construction and Description of Algorithms 311

*Statistical Algorithms AS*142–*AS*145 319

AS142 Exact tests of significance in binary regression models *L. Bayer and C. Cox*; AS143 The median-centre *F. K. Bedall and H. Zimmermann*; AS144 Random $R \times C$ tables with given row and column totals *J. M. Boyett*; AS145 Exact distribution of the largest multinomial frequency *P. R. Freeman.* Correction to AS141 *by P. Kent*; also to ASR30 by *G. E. Thomas*

Recent Statistical Algorithms 337
